

# Supply Chain Management Minor

This checklist is based on the current academic catalog and is subject to change. Students should meet with their academic advisor each semester and use Degree Works to monitor their individual progress toward completion of the minor.

The supply chain encompasses activities associated with the planning, sourcing, creation, and delivery of products and services. SCM is the discipline that manages the linkages between external partners and internal functions to optimize the flow of products, services, information, and money. Effective supply chain management is a potent strategic resource for organizations to deliver more value, lower costs, and more agile responses in the face of steady change.

## Curriculum Checklist

18 credits are required for the Supply Chain Minor and at least 12 of the 18 credits must be earned at Commonwealth University. A minimum 2.0 cumulative average must be achieved in the courses counted for the Minor.
